

# Series 1500

Series 1500 is an adaptable elastomeric coating offering surface protection from various effects of impact, wear, abrasion and corrosion. It is available in a smooth or textured finish, depending on the process needs, and is great for preventing scratches and wear on contact parts. The sophisticated chemical composition offers excellent adhesion to all sorts of materials: metals, alloys, plastics, concrete, wood, etc.

Abrasion Resistant

Corrosion Resistant

Scratch Protection

Highly Elastic

Resistant up to 284°F

Solvent-Based

Smooth or Textured

Durometer  
60, 80, 90, 98 Shore A

FDA 177.1680

## Applications:

- Automation Tooling
- Automation Nesting
- Robotic EOAT
- Vibration Chutes
- Cylinders / Rollers
- Storage Tanks
- Feeder Bowls
- Impact Plates
- Hoppers
- Piping
- Tool Carriers
- Dies
- Mixers
- Transfer Equipment
- Tools
- Packaging
- Liners
- Gripper Components
- Work Holders

Rapid Coating Solutions' Series 1500 is a very durable protective coating and can be applied in thicknesses between 0.5 and 2.0 mm. Available in many different colors, the Series 1500 can be customized to suit many needs.
